

Elkskin Stick Glove with Nomex® Lined Back

The ultimate comfort and durability for heavy-duty applications

Providing the ultimate in comfort and protection, the Black Stallion® 850 stick welding glove is made of supple, yet durable elkskin leather. The reversed grain palm provides added dexterity and feel, the smoother grain-textured surface facing inwards helps reduce discomfort against your palm. We've added the same flame-resistant Nomex® chosen by firefighters and racecar drivers to line the back for better protection against heat. Additionally, the Kevlar® stitching provides greater protection against sparks, and better abrasion resistance.

ITEM NUMBER

850

SIZE

S, M, L, XL

SPECIFICATIONS

- Thicker elkskin leather with natural insulation, elongated cuff, and fire resistant lined back make this glove a premium choice for all STICK welding applications.
- Kevlar® stitching provides greater protection against sparks, with better abrasion resistance
- Thumb Strap provides extra reinforcement in a key stress area
- Reversed grain palm provides a softer feel against the hand with improved grip
- Dupont® Nomex® lined back offers extra flame-resistant protection
- Rigid Cuff for extra protection against sparks and spatter

Naturally Insulating Softness

Elkskin is the "top-shelf" leather of choice for premium welding gloves; superior softness and natural insulation

With reversed grain, the smoother grain-textured side makes contact with the hand; improves feel, dexterity and comfort
