

WHEN IT COMES TO
CLARITY,
 THE CHOICE IS **CLEAR.**

 **2X** THE CLARITY FOR THE VISIBILITY YOU NEED

Advanced high-definition optics deliver a clearer, brighter, more realistic view for every stage of every weld.

Clarity and Productivity

- 2x the clarity compared to welding helmets with 1/1/1/1 as per official USA ANSI certification of lens visibility
- Welders can keep their hood down between welding and non-welding tasks within arm's reach of the workpiece for improved safety and productivity

Better Quality and Color

- With a brighter light state, welders can better see their workpiece, puddle and wire
- Allows more colors of the visible light spectrum for accurate color, less blue, green or yellow tints

SEE MORE CLEARLY IN DIFFERENT STYLES AND DESIGNS.

ClearLight™ 2.0 is available in all Digital and T94™ Series welding helmets.*

*Classic Series helmets have 1st generation ClearLight™ Lens Technology
